From Cards to Looms

Protects Cotton From "Oil Spot" Damage

That's the story in a nutshell. **NON-FLUID OIL** stays in bearings, until entirely consumed—in-
stead of dripping and leaking like liquid oil.
It not only prevents oil spots, but it goes from
3 to 5 times as far as liquid oils, reducing oil
and application costs.

Right the FIRST time!

When you need repair parts for your Saco-Lowell equipment, practise economy by obtaining those sold under the above label. You will find they fit smoothly into place, for the simple reason that they are identical with the parts they replace. You will find they give longest life because they are made of the materials indicated best by long experience.

We should like also to call your attention to the fact that many of the features accounting for the better performance of present day Picking, Carding and Drawing equipment are adaptable to existing machines.

These improvements are described in the free booklets offered below.

South Carolina Manufacturers Hold Annual Meeting

WITH more than 100 mills represented, the annual meeting of the South Carolina Cotton Manufacturers' Association was held last Thursday at the Spartanburg Country Club, Spartanburg.

A discussion of tax problems, continuance of the code hours and wages and other current questions were featured at the meeting.

All officers were re-elected for another year. They are S. M. Beattie, Greenville, president; A. F. McKissick, Greenwood, vice-president; William P. Jacobs, Clinton, secretary and treasurer, and T. Frank Watkins, Anderson, general counsel.

Members of the executive committee elected at the meeting were James C. Chapman, Sr., Spartanburg; E. M. Johnson, Greenville; L. O. Hammett, Anderson; Eliott W. Springs, Lancaster; Emslie Nicholson, Union; A. E. Jury, Winnsboro, and W. P. Hamrick, Columbia.

Past presidents who also are honorary members of the executive committee include Ellison A. Smythe, Balfour, N. C.; J. C. Evins, Spartanburg; E. F. Woodside, Greenville; T. M. Marchant, Greenville; W. S. Nicholson, Union; W. E. Beattie, Greenville; A. E. McKissick, Greenville; J. E. Sirrine, Greenville.

There were no set speeches at the meeting, but the discussions on various subjects proved very interesting. During these discussions, the manufacturers were urged to avoid any changes in the present wage and hour set-up. One of the prime objectives of the association, it was pointed out, should be to gain the confidence of the public and of the operatives within the industry in South Carolina.

Textile manufacturers of the State were complimented by Robert M. Cooper, collector of internal revenue for South Carolina, in his address, devoted in large measure to a discussion of the processing tax, a topic in which the entire industry has been vitally interested since its inception.

COOPER TALKS OF TAX

Mr. Cooper urged the manufacturers to ask for 30-day extensions instead of suing for rebate of the processing tax. He said that approximately \$20,000,000 in processing taxes has been collected by his office without difficulty from the textile industry and that less than one-half of one per cent of the amount due has not been collected. Of the amount not yet collected, he estimated, not more than \$30,000 to \$50,000 will fail to reach the government coffers. He praised the industry in this State for its promptness and readiness in meeting its obligations in connection with the processing tax.

J. Roy Barron of Rock Hill, chairman of the tax board of reviews, in discussing property taxes, urged the manufacturers to assume their responsibilities as community leaders and to exert their influence toward discouraging local extravagances.

Mr. Barron said that textile manufacturers are, by virtue of their occupations, leaders in their respective communities, and by reason of that leadership they should be able to aid in curbing extravagant programs in their communities. Nine-tenths of taxes go for local rather than State purposes, he pointed out, and for this reason sane, economical, thoughtful administration of local affairs is imperative. He asked manufacturers to shoulder their responsibility with their communities' weal uppermost in mind.

W. A. Moorhead of Goldville offered the report of the power rate committee, which revealed that decided decreases had been recorded during the year.

The association went on record as opposing Senate Bill 2944, the purpose of which is to prevent appeals before government departments, bureaus and commissions by others than attorneys. The association felt that its interests would be adversely affected by passage of the proposed legislation.

TRIBUTE TO DECEASED

The resolutions committee, of which J. E. Sirrine is chairman, submitted the following resolution, which was unanimously adopted, deploring the death of Victor M. Montgomery of Spartanburg, widely known textile executive who died last year:

Whereas, Almighty God has seen fit in His all-wise providence to remove from this world our much beloved companion and co-worker, Victor M. Montgomery.

Whereas, Mr. Montgomery has been one of the outstanding leaders in the textile field during the present generation.

"Whereas, in unselfish service to the industry, both in official and unofficial capacity, with this and other cotton manufacturing associations, Mr. Montgomery has contributed far more to the welfare of the industry than the average manufacturer.

Whereas, particularly in service in connection with the Traffic Committee his leadership has been tremendously beneficial to the cotton manufacturers in this and other States.

Whereas, he was for many years one of the most beloved manufacturers within the field, and enjoyed the great respect, deep devotion and whole-hearted appreciation of the industry at large.

Whereas, as a manufacturer, he has built a monument for himself and an ideal for the industry to follow through the generations to come.

Whereas, he was a true friend to the manufacturers, workers and the public at large, and faithfully discharged his full responsibilities of citizenship.

Therefore be it hereby resolved by the Cotton Manufacturers Association of South Carolina, assembled in Spartanburg, S. C., this the 27th day of June, 1935, that the Cotton Manufacturers' Association hereby officially records with great regret the loss of so constructive a leader, and expresses its deepest sympathy to his family and closest friends.

These resolutions are hereby ordered to be spread upon the minutes of the Association, and a copy transmitted to his family.

Respectfully submitted,

COTTON MANUFACTURERS' ASSOCIATION OF SOUTH CAROLINA.

ABSENCE REQUESTED

Resolutions of regret in connection with the absence because of illness of the following prominent manufacturers were adopted by the Association: Capt. Ellison A. Smyth, Balfour, N. C.; Dr. W. C. Hamrick, Gaffney; C. M. Bailey, Clinton, and James P. Gossett, Williams-
ton.

The morning session of the Association was addressed by President Beattie, who reviewed the Association's activities during the past year.

PRESIDENT'S ADDRESS

The text of Mr. Beattie's address follows:

"Since our last annual meeting, we have been through one of the most intensely interesting, as well as exciting and strenuous years that we have ever known, and the memory of it all is so fresh and vivid as to make it unnecessary to attempt to recount all that was done or attempted, and the vast amount of time, effort and money that has been expended in the search for improvement or progress. Probably it is all too recent and too near for us to see and intelligently appraise the picture as a whole and know whether we are succeeding, but I have great faith in our country and State, and take comfort in the thought that the feeding, clothing, housing, and pleasuring of 130,000,000 people means an enormous volume of business that we are bound to share. Also I am tempted to add, that while the recent momentous decision of the Supreme Court reaffirming the principle of States rights is vastly important to the country as a whole, it is equally vital to this State and this section in that it guarantees us the opportunity to continue the remarkable progress and development that has taken place during the past sixty years, or since this State was freed from political control at Washington. Certainly much has been accomplished in that time, and I confidently hope that the next sixty years will see equally as great development.

"I recently received a card from one of our members in Japan bringing this comment, 'All working together for one purpose.' That brief but significant observation probably explains the main reason for the great strides Japan is making, and I am sure that we also could forge ahead by following her example. It seems to me that this State has made a start in that direction recently, since a better understanding and more mutual helpful attitude appears to be developing, possibly as a result of the strife, dangers and uncertainties that have confronted all elements during the past year.

PRAISE OF PRESS

"It has been especially encouraging to note the helpful and constructive attitude of the press, and the kindly

interest in the industry that we encounter on all sides is a good sign. The more friendly attitude and better understanding that is developing between management and workers in the industry is so vitally important to both that we should spare no effort to further it.

"The mills of the State are the farmers' best customers, and the farmers are important customers of the mills, so there is every reason for the most cordial relationship between these two principal industries. Our friendly interest in the cotton farmer is demonstrated by our sponsoring, for many years, the State contests for the growing of better cotton, and on the other hand the mill communities throughout the State with their many thousands of inhabitants, afford the farmers a ready market for varied products. In addition to other reasons, self interest would seem to dictate a friendly relationship between these important groups, and we should take advantage of every opportunity to cultivate it.

"In addition, the merchants as well as various other groups of our citizens are both directly and indirectly affected by the condition of the industry, and indeed it may be truthfully said that, as go the mills so goes South Carolina, at least in large part. All this may sound a bit elementary but after the results we have witnessed time and again, of arraying one group against another, of emphasizing only the bad in one class as against the good in another, of the popular tendency of passing the buck to Uncle Sam and trying to cure our economic ills by laws, of the effort in Washington to regulate barn-yard and mill-yard activities hundreds or thousands of miles away, and of various other new-deal plans that have been or are being tried, it seems to me that we are badly in need of emphasizing some of the fundamentals that have been proven and that we know we can tie to in safety. It is for this reason that I commend to you who are leaders, the plan of trying to make the relationships in your communities more cordial and mutually helpful, and of trying to make this the best understood and most highly valued industry in the State.

TAXES ARE HANDICAP

"The mills of this State still have the unenviable distinction of paying the highest taxes per spindle of any textile State, and I believe that it is only through a wider appreciation of this handicap and a better understanding of its results that we can hope for relief.

"Another handicap which is probably less understood is the higher freight rates; the two Carolinas have the further distinction of paying the highest average freight rates to the principal consuming centers, of any of the textile States. This not only affects the mills adversely but all other business in this State as well, and we are now confronted with the recommendation of the examiner for the Interstate Commerce Commission to further raise the Southern rates and reduce those from the East, and this is in the face of the findings of the co-ordinator of transportation that it costs more to handle a freight-ton-mile in the East than in the South. All we are asking in this connection is equality of opportunity and our traffic department is making a strong fight to protect us as well as all other interests, which if generally understood would undoubtedly draw support to our cause from all elements in the State.

"I have endeavored to direct the activities of the Association to matters of common interest to all of its members and not permit it to be drawn into controversial questions where there are divergent interests. I believe in this way it can and will be the continuing and greater service to the industry and to the State.

"Your Association has tried during the year to meet added responsibilities with added effort, and to those of

you who have served so effectively in our committees and otherwise, I desire to express my appreciation; the list is too long to name each one, but I want you to know that your willing and prompt response to all calls, as well as the friendly support of our entire membership, has made it a pleasure to serve you."

The report of Secretary W. P. Jacobs showed that the year just ended has been one of the busiest in the Association's history, the organization having encountered and considered many problems unknown in the earlier days of the textile industry.

Says Northern Mills Adhere To Standards

Despite terrific pressure to make concessions, Northern cotton manufacturers are adhering to their agreement to make no changes in the conduct of the cotton textile business, Lincoln Baylies, chairman of the Northern Mills Committee on observance asserted after a comprehensive survey.

Baylies' committee was appointed by President Ernest N. Hood of the National Association of Cotton Manufacturers to insure compliance with a resolution passed by the manufacturers following the Supreme Court decision on the NRA. The resolution was passed to preserve the best features of the defunct cotton textile code.

"Continuance of this concerted program will ultimately lead to better business," Baylies asserted. His bulletin to Northern manufacturers referred to a letter urging full compliance sent by President Thomas H. Webb to members of the American Cotton Manufacturers' Association, comprising the Southern group. Baylies' bulletin follows in part:

"A month has now passed since the NRA was declared unconstitutional. The chaos and price-cutting so many expected has not developed in cotton textiles. Mills have not had to slash inventory values. Curtailment to prevent accumulation of stocks is very general.

"The primary market is now quite generally convinced that the mills intend to work for stability. Hesitation in buying is principally due to fear of what the Washington Administration may do to further upset sound business principles.

"The present condition in the industry has been accomplished by the action of practically every mill in the United States in continuing the provisions of the code requirements, in the face of terrific pressure for price concessions and an unusually severe seasonal slump in demand.

"Continuance of this concerted program will ultimately lead to better business.

"In the Northern section of the industry there have been only three rumors of breaking away from code requirements reported to the Committee on Observance, and on investigation none of these rumors proved to be founded on fact—surely a record to be proud of."

Draper Buys Standard Looms, Inc.

Stockholders of the Textile Machinery Corporation, owners of the former Standard Looms, Inc., located at East Spartanburg, Saturday accepted an offer of \$300,000 made for the plant by the Draper Corporation of Hopedale, Mass.

The stockholders met in the morning in the Montgomery Building.

Bernard Manning, president and treasurer of the Textile Machinery Corporation, said owners of over 90 per cent of the common and preferred stock had agreed to accept the offer, while the few others remaining had not been heard from. Mr. Manning expressed confidence they, too, would agree to the sale.

LETTERS MAILED

In a letter notifying the stockholders of the meeting, the president told them if the offer was accepted by 90 per cent of the stockholders their certificates would be delivered to the buyer.

The Standard Looms plant was established here in 1928. After operating for some months, it was closed. The Lombard Iron Works of Augusta, Ga., leased the plant March 1, 1934, and operated it until several weeks ago, when its lease was cancelled by mutual agreement.

It was said at the office of the Draper Corporation at Fairforest that plans would be announced soon concerning what will be done with the plant purchased.

Says World Cotton Market Lost By United States

THE United States has already lost or is fast losing its dominating position in the world cotton market and has little prospect of regaining that leadership, according to *Fortune Magazine* for July. In a comprehensive survey of the entire world cotton situation contained in an article, "Cotton's in the Well," the magazine asserts that "American cotton has gone or is going precipitately and irretrievably to Hell."

Indicating complete withdrawal from the world cotton market and reorganization of the cotton-growing industry on a national basis as the only way out, the magazine summarizes the picture for "King" cotton as follows:

"The United States, which has long dominated the world market for raw cotton is losing its dominating position and is being supplanted by other producers. A considerable part of that portion of the American crop which has always been grown for export will not find a buyer. What that implies in turn is that the whole agricultural economy of the South—an economy based entirely upon cotton—must be reorganized: that the vast marketing and banking organization built up around export cotton must be contracted and in large part dismantled: that a good share of exports worth from a third of a billion to a billion dollars must be surrendered and that the United States must step down from one, and perhaps the chief, of its positions of world leadership."

Despite the recent belief that cotton "was out of the woods," that 12-cent cotton had unfrozen the South and that a big buying boom had started in the cotton belt, the magazine asserts: "Nevertheless and notwithstanding, the crown of King Cotton was never more precariously balanced upon his left eye brow than it is today."

The facts gathered by *Fortune* "seem to indicate that the real reason why American cotton is on its way to Hell is neither AAA cotton restriction nor American tariffs, but something quite foreign to either: the migration of the cotton textile industry from western Europe to the Orient. The real reason, in other words is Japan, but not at all Japan as the American textile industry understands that word."

It is not Japanese competition in the textile export field either in South and Central America or in the United States itself that gives significance to Japan in the raw cotton picture, the magazine says.

"It is only indirectly that Japan figures there as a seller of textiles. Her real importance is as a buyer of bales of cotton. By virtue of the migration of the textile industry to the Orient, Japan now emerges as the largest consumer of export cotton on the world market. No nation can dominate that market which cannot sell to Japan. But no nation can sell raw cotton to Japan for any length of time which will not admit Japanese products directly or indirectly to its own markets. And Japanese products are increasingly manufactured products—and excessively cheap manufactured products. The real rub is there. The real reason for the probable contraction of American cotton exports is that we cannot afford to sell our cotton in increased quantities to the one buyer able to buy it in increased quantities."

There are two reasons, *Fortune* says, why the United

States cannot afford to dominate the world market for raw cotton. "The first is that to sell the same proportion of world requirements as we sold before we should be obliged to sell at a price which would not support the textile and mortgage structure now resting upon cotton in the South. The probability is that the United States could meet the conditions imposed by the world market only by lowering costs of production. Which invariably means an even lower standard of living in the South than that now existing."

"The second and more important reason is the Japanese threat. To dominate the world market the United States must sell its cotton to the largest buyer of that market. And to sell its cotton to the largest buyer on that market the United States must be prepared to accept that buyer's goods in exchange. If, then, it is true as a general proposition that the United States, to dominate the raw cotton market must sell the larger consumer on that market, then the United States must sell Japan. If it is true that, to sell the largest consumer, the United States must permit imports of that consumer's goods in return, then to dominate the world cotton market the United States must permit importation of Japanese goods."

"The key to the crisis is not a mere local and parochial disturbance caused by the interference of an American political party in a matter beyond its comprehension, but one of the major economic dislocations of our time. The key to the cotton crisis is the migration of the industrial revolution toward the cheap labor pools of the Orient."

"It is possible that the American textile manufacturer, grown otiose behind his tariffs, may regain the inventiveness and energy of his predecessors and meet the Japanese wage advantage as Ford meets the wage advantage of certain of his competitors. But it is not likely. The greater probability is that America, which now practices economic nationalism in cotton while talking tariff reform and world trade, will accept and make permanent the existing situation. In which case Secretary Wallace, champion of international trade relations, will be remembered as the founder of a closed economy."

Answering the question of potential cotton production in other countries, *Fortune* says that "there is no reason whatever for believing, as the old Southern Senators used to believe, that United States cotton is king and that God has anointed it forever." Of the five important cotton producing countries in the world (outside of the U. S.), China and India will not be able to increase production materially because neither can afford to take the land away from food crops. Russia's cotton future is limited because of unfavorable climatic conditions. But Egypt must be considered as "a potential menace" because arable land growing excellent crops is being increased along the Nile, while Brazil offers a threat of real proportions.

"A potential cotton belt exists in Southern Brazil with an area equal to Texas, Oklahoma, Louisiana and Arkansas combined. About one-half of that area is virgin land. Climate and soil are favorable. There is every reason to suppose that Brazilian cotton acreage will in-

(Continued on Page 9)

Golf Tournament At Blowing Rock

The following were the players and their scores in the tournament of the Piedmont Section of the American Society of Textile Chemists and Colorists, at Blowing Rock, N. C., June 28th. Those who took such a large handicap, that their net score was below 67, were eliminated from consideration in awarding the prizes.

The prize for the low gross score was won by G. S. McCarthy, Charlotte, with a 74.

The following with 67's tied for the low net scores: J. H. Zahn, Geo. Small, F. E. Sprock, Art Gilchrist, J. W. Ivey and Cliff C. Myers. All of those who had net scores of less than 67 were eliminated under the rules of the contest. Those with scores of 67 drew for the prize and it was won by J. W. Ivey of Charlotte.

Jack Garrett won the first guest prize with a low gross of 71, while the second guest prize was won by the speaker of the evening, H. L. Derby.

Jack Robinson won the consolation or booby prize.

J. W. Sandridge, Greensboro, won the putting prize with 28 putts.

Textile Chemists Meet At Blowing Rock

THE regular summer outing of the Piedmont Section, American Association of Textile Chemists and Colorists, was held at Mayview Manor, Blowing Rock, N. C., last Saturday.

The annual golf tournament was played in the afternoon.

The complete scores of all players taking part in the tournament are published on Page 7.

Paul Haddock, chairman of the group, acted as toastmaster at the dinner in the evening. The only speaker was H. L. Derby, president of the American Cyanamid & Chemical Corp., New York, whose subject was "The American Chemical Industry."

THOSE PRESENT

Among those who registered for the meeting were the following:

Anderson, Robt. B., Franklinton, N. C.; Avery, G., Phenix Mills, Statesville, N. C.
Barnett, J. G., Charlotte, N. C.; Batchelder, Chas., Tenn. Eastman Corp., Kingsport, Tenn.; Bearden, H. P., American Cyanamid & Chem. Co., Charlotte, N. C.; Berlolet, Wm. H., Laurel Soap Mfg. Co., Philadelphia, Pa.; Bennett, John, Commonwealth Color & Chemical Co., Shelby, N. C.; Biek, E. C., Biek & Co., Reading, Pa.; Black, Sam L., Hoover Hosiery Mill, Concord, N. C.; Black, W. M., N. C. Finishing Co., Yadkin, N. C.; Bolin, Paul, Dusseldon Chem. Co., Savannah, Ga.; Boyd, A. M., Victor-Monaghan Co., Greenville, S. C.; Boyd, L. M., Scholler Bros., Philadelphia, Pa.; Brockman, A. D., First National Bank, Kingsport, Tenn.; Brooks, Clyde K., Renfrew Bleachery, Travelers Rest, S. C.; Bruce, Robt. A., W. H. & F. Jordan Mfg. Co., Greensboro, N. C.; Burt, A. M., Charlotte Chemical Laboratories, Greensboro, N. C.; Button, Jack, Jefferson Island Salt Co., Charlotte, N. C.; Byrd, J. F., Carolina Cotton & Woolen Mills, Spray, N. C.

Depression Gone, World Chamber Delegates Think

Paris.—The world depression is ended and business is well on the way to recovery, in the opinion of most delegates from thirty-nine nations to the World Congress of the International Chamber of Commerce.

The death of the depression was considered an accomplished fact, although the opinions of the business men differed as to how rapidly the world would reach general prosperity.

The majority opinion of the delegates of every nation was that signs of prosperity in the United States, England and other countries must mean that the world is definitely out of the depression and that business is forging upward slowly.

World Cotton Market Lost By United States

(Continued from Page 6)

crease. If only 5 per cent of the total area of the Southern Brazil cotton belt were planted to cotton as is the case in the American cotton belt, the cotton acreage would be 18 million which would be sixteen times its present extent and almost half the American acreage of the late 20s.

As for the much-talked-about mechanical cotton picker, the article asserts that if it ever becomes operable "it will not be operated first in the American South where it would meet the competition of cheap peon labor and where the land, outside of Texas, is largely cut up into uneconomical units. It will operate in Brazil (and in the Argentine) where the farming units can be laid out to suit and where the competition of human labor is practically non-existent."

Cotton is also inextricably involved in the Abyssinian trouble spot, *Fortune* says:

"Statistics make dull reading at first sight and the statistic which records that a Japanese controlled corporation has leased 650,000 hectares of cotton-growing land in Abyssinia and that Abyssinian tariffs on Japanese goods have been cut, is also dull reading at first sight. It ceases to be dull when Mussolini, who can no more make war without the acquiescence of the British fleet than he can make gasoline without oil—and for the same reason—begins to bully the Emperor of Abyssinia. When Mussolini ships his divisions to Eritrea and when Great Britain is unable to dissuade him, the 650,000 hectares and the tariff agreement become very eloquent indeed. They talk. And their talk is heard as a Japanese threat to British economic supremacy in Africa."

MEMO
A FINE FINISH
is
a Big Help!

In the textile industry, we're selling a feminine market! That's why beautifully finished fabrics have the best sales prospects.

To get a finish that is rich, soft and appealing, turn to ONYX—specialists on finishing materials.

Leading finishers depend upon ONYX compounds to produce their fine fabrics. Write for a representative to demonstrate the advantages of ONYX compounds in your mill, without obligation.

Personal News

C. M. Michie has been appointed superintendent of the Somerset plant, John Watts & Sons, Roxboro, N. C.

E. B. Covington, of Danville, Va., has become overseer of finishing, second shift, Pilot Mills, Raleigh, N. C.

J. D. Whatley has been elected assistant treasurer of the Duncan Mills, Greenville, N. C.

S. F. Sherman, who has been connected with John F. Street & Co., yarn merchants, of Philadelphia, has been appointed general manager of John Watts & Sons (Somerset plant), Roxboro, N. C.

R. H. Rouse, formerly with the Oneida Mills, Graham, N. C., is now overseer weaving, second shift, at the Pilot Mills, Raleigh, N. C.

Charley Phillips, formerly with the Rhode Island Mills, Spray, N. C., is now overseer of weaving at the Pomona Manufacturing Company, Greensboro, N. C.

Brown Mahon has been elected secretary of the Duncan Mills, Greenville, S. C. He succeeds the late David Cardwell, who died some weeks ago.

Harry M. Rhett has resigned as treasurer and general manager of the Dallas Manufacturing Company, Huntsville, Ala., but will continue as a member of the board of directors. He is succeeded by George S. Elliott, who has been plant manager of the Pacolet Mills, New Holland, Ga., as announced last week.

Julius W. Cone, of the Cone group of mills, Greensboro, N. C., will continue as president of the North Carolina Traffic League. R. B. Robertson, of Canton, was elected vice-president, and W. S. Creighton, Charlotte, re-elected secretary and treasurer.

Rayon Group Elects C. W. Dall

Charles Whitney Dall was elected president of the National Rayon Weavers' Association at the semi-annual meeting of its board of directors at the Union League Club, New York. He succeeds Percy S. Howe, Jr., of Suncook Mills, who tendered his resignation to the directors after serving as president of the association since its organization two years ago. Hr. Howe will continue to serve as chairman of the board of directors.

He asked to be relieved of the presidency because of ill health and because of pressure of his business. His resignation was received with regret by the board which extended hearty thanks to Mr. Howe for his services of the past two years, expressing recognition of the manner in which he had both sacrificed his health and taken time away from his own business to serve the interests of the industry.

Mr. Dall, the new president of the association, has been secretary of the group since its organization. At the last annual meeting he was also elected executive vice-president.

The directors named Miss Marie F. B. Wey as assistant to the president. Like Mr. Dall, Miss Wey has been connected with the association from the beginning.

Following the election of the new president, routine matters were discussed by the directors. Hope was expressed that members would continue to observe wage and hour provisions of the cotton textile code.

Distributors Meet in Charlotte

A meeting of the North and South Carolina distributors in the hardware, electrical and mill supply fields was held at the Hotel Charlotte, Charlotte, on Saturday, June 29th, by Hygrade Sylvania Corporation, makers of Hygrade lamps, and one of the countries' oldest companies in the lamp industry.

Methods for the improvement of present trade conditions and practices were discussed, with particular emphasis on incandescent lamp merchandising.

Charles G. Pyle, sales supervisor of the Hygrade Sylvania Corporation, was the chief speaker.

Among the distributors of Hygrade lamps from the two Carolinas in attendance were: Sullivan Hardware Co., Anderson, S. C.; Montgomery & Crawford, Spartanburg, S. C.; Tidewater Supply Co., Columbia, S. C., and Asheville, N. C.; Charlotte Supply Co., Charlotte, N. C.; Gastonia Supply Co., Gastonia, N. C.; Shelby Supply Co., Shelby, N. C.; Dillon Supply Co., Raleigh and Durham, N. C.; Brown-Rogers-Dixon, Winston-Salem, N. C.

Also present were the following territorial representatives of Hygrade Sylvania Corporation: J. R. Carter, Donald Follmer, Ben A. Dahlin, Robert M. Seepe.

The meeting was followed by a banquet held later in the evening.

Bahnson Co. Building Addition

A three-story unit to provide 12,000 additional square feet of floor space is under construction by the Bahnson Company, manufacturers of humidifiers and air-conditioning equipment.

The building is being erected as an extension to the Bahnson Company's present plant on South Marshall street. It is to be 80 feet long and 50 feet wide.

The expansion program of the Bahnson Company comes as a result of the development and sale of the combination humidifier and heating unit which was placed on the market several months ago.

A decided increase in the export business of the Bahnson Company was also credited with playing a major part in bringing about expansion.

A section of the new building will be used to do experimental work looking toward further developments in their equipment.

F. F. Bahnson and A. H. Bahnson are founders and owners of the business.

Howard Bros. Picnic

Howard Bros. Manufacturing Company, of Worcester, Mass., were hosts to their employees and members of their families at a picnic supper near Worcester, last Thursday evening, the occasion being the company's annual outing. The supper, at which Harry C. Coley, president, acted as toastmaster, was preceded by a number of athletic contests. More than 300 attended.

J. G. Barry, G. E. Vice-President, Retired

The retirement of John G. Barry, senior vice-president of the General Electric Company, after more than 45 years of service, and his election to an honorary vice-presidency, was announced by President Gerard Swope following the meeting of the board of directors held in

New York on June 28th. Mr. Barry, as active head of the apparatus sales organization, has for many years formulated and executed the company's policy and sales program in the apparatus field. He will maintain an office in Schenectady and will be available for consultation. The retirement is effective as of July 1st.

Mr. Barry's career with General Electric has actually encompassed a half-century, when it is considered that he went direct from school into technical training as an apprentice and test man with the old Thomson-Houston Company. He was formally employed for the first time in 1890, however, and soon became a member of the railway department, going to New York and then Schenectady, in 1894, when the home offices of the newly-formed General Electric Company were established there. His talents in the commercial field were so evident that within three years he had been made assistant manager of the department—then one of the two main divisions of the company.

Avoid A Tragic Future BY KEEPING YOUR EQUIPMENT MODERN

Mr. J. M. Shelton, vice-president, Robert & Company, Atlanta, made this recommendation in his address on "Modernization", reported in the April, 1935, *Textile World*:

"Be accurately informed as to the exact condition of your equipment and its relative efficiency as compared with new machinery and processes."

"It doesn't take a prophet," asserts Mr. Shelton, "to forecast that there will always be a huge market for textile goods in this country. Someone must supply that market. Now is the time for manufacturers to decide whether they will supply this demand and at a profit—or whether they will sit by and take what is left after the well-equipped mill has gone home with the bacon."

The Type K Bobbin Stripper—with a speed of 100 to 120 bobbins a minute—is making it possible for many manufacturers to supply the demand for their goods at a profit.

The morning this advertisement is being written, we quoted a mill on a Type K Bobbin Stripper to replace the next most efficient machine, which the mill is using, and calculated a maximum possible saving of more than 275% net yearly, and a minimum possible saving of more than 100% net yearly. There are hundreds of other mills in the United States that can make similar savings through changing to Type K machines.

Our salesmen and representatives are prepared to investigate any installations and to make recommendations and prepare estimates of savings that can be made through change to Type K machines.

If you want to know what can be done in your mill, write us. There is no obligation.

OUR MOTTO

QUALITY AND SERVICE

Home Office—New Bedford, Mass.

sponsible for this, since these cottons that look like wool, in expensive wool designs, make smart tailored frocks. Dark cottons fill a real need for the woman who dislikes summery cottons in the cold weather, yet finds a wool dress too hot for steam-heated houses and apartments—and the manufacturers are in hot competition to turn out better and better fabrics which look and feel like wool, in bright, strong colors.

TWILLS

The dyed-in-the-yarn twills, in plaid designs, are considered perfect for tailored winter dresses—in plaids, checks and broken checks. Among the new color combinations were black and gray and red (gray shows every indication of continuing in popularity this winter, particularly when combined with vivid shades), green and orange, brown, green and yellow. All the colors are rich, warm tones and the designs are wool designs.

Then there were piece-dyed novelty twills, in tie silk patterns, bright, deep backgrounds with the traditional foulard designs—a royal blue with yellow and red pattern was particularly good. These materials had only just come in, so it was impossible to get photographs in time for the issue.

MOMIE CREPE IS 1935-6 NEWS

Momie crepes will be much in demand this winter, in wool designs, and the examples we saw were evidence that manufacturers and designers are working overtime on new effects. The checks are very good in this fabric, a brown, green and white one especially so.

CORDED COTTONS

Some corded fabrics, rather thinner than the twills, have arrived in a variety of colors and patterns. The weave is very fine, and the cords of several threads, running evenly both ways of the fabric, form a self check. The peasant influence, so strongly felt this summer, has carried over into these novelty cords for winter. Bright red, royal blue, rich green, tawny yellow, black and brown predominate, and there are geometrics, shepherd checks, multi-stripes, peasant designs. The fabrics we saw were from an exclusive house, and the colors were guaranteed fast.

VELVETEENS

Velveteens for winter are very varied, and the stylists predict dresses, suits and coats, both for formal and informal wear. The whales run from the very narrow pique type to fully a half-inch wide, and in some cases they are regular and in others irregular. The plain velveteens have such a silky surface this year that it is almost impossible to think of them as cotton, and there are some new colors, or rather, new tones. The flame and royal blue were very rich and a nutty, russet brown will be very much in vogue for wear with brown furs.

PERCALES AND LINENES

There are the usual percales and print cloths, with nothing particularly arresting, except perhaps a tendency to small floral patterns in soft pastel colors. Many of them are sanforized, and there are some pretty designs for children's frocks—a blue and orchid design of the hare and the tortoise was very dainty and amusing. There are not so many linenés as in other years and what there are run mostly to geometrics and florals—not so many plaids and stripes.

MISCELLANEOUS

Sateens and broadcloths will be in demand this fall and winter in some measure, and fine sheetings dyed in print cloth designs in geometric patterns. Crashes are good in Indian print designs, strong, bright colors on white. There are not many gingham in so far, and nothing very new. Plenty of vivid checks and plaids.

COCHECO—

The Broad Path to Economy in Power Transmission

For power transmission with minimum waste—COCHECO!

For long efficient belting service—again, COCHECO!

For "long run" belting economy---always, COCHECO!

COCHECO Belting, made of the best leather correctly handled from the hide to finished product, offers highest quality and maximum satisfaction in power transmission service in every type of drive in which leather belting is used.

"Our Book on Belts" gives details on COCHECO Belting--how it is made and why users of leather belting all over the world find it most economical.

The Wagner Bill

CONGRESS has passed the Wagner Bill in a somewhat modified form and our advice to cotton mills is to pay absolutely no attention to the bill or to any of those who assume authority under its provisions.

The United States Supreme Court has, by a unanimous decision, very plainly and emphatically said that Congress has no control over labor within the several States.

The Constitution specifically states that all powers not conferred upon Congress are reserved to the State and no control over labor has been given.

To show how unconstitutional the Wagner Bill really is, we quote from the decision of the United States Supreme Court in the case of the Hitchman Coal & Coke Co. vs. John Mitchell, 245 U. S. 229, page 251, as follows:

This court repeatedly has held that the employer is as free to make non-membership in a union a condition of employment, as the working man is free to join the union, and that this is a part of the constitutional rights of personal liberty and private property. . . .

In that decision, which has not been superceded or reversed by another decision since then, the United States Supreme Court held that an employer could make non-membership in a union a condition of employment.

We do not favor any such policy and hope that it will not be adopted by any cotton mill, but it is the law and is so entirely contrary to the objectives of the Wagner Bill that we publish it as additional evidence that the new attempt to force a closed shop in America is worthy of no consideration whatever.

Who Won?

THERE has been an impression that the Democrats won the National election in 1932, but it might be well to look the facts in the face.

The Democratic platform began with this "solemn covenant" with the people:

The Democratic Party solemnly promises by appropriate action to put into effect the principles, policies and reforms herein indicated.

Those indicated in the platform were:

- (1) The repeal of prohibition. (That was perfected.)
- (2) An adequate National Defense. (That has been partially perfected.)
- (3) A drastic reduction in governmental expenditure. (There has been the greatest increase in expenditure ever known.)
- (4) Abolition of useless commissions and offices. (Almost countless new commissions and offices have been added.)
- (5) Consolidations of departments and bureaus. (Additional departments and bureaus have been added.)
- (6) Eliminating extravagance. (Greatest extravagance ever known.)
- (7) A Federal budget annually balanced. (Federal budget has been deliberately unbalanced.)
- (8) Unemployed and old age pensions under State laws. (Effort made to enact Federal instead of State laws.)

With the exception of the first two planks all other planks or platform pedges of the Democratic party have been ignored.

Consider now the platform of the Socialist Party as adopted May, 1932, at Milwaukee:

- (1) The entrance of the United States into the World Court. (Failed in spite of the Democratic Administration's support.)
- (2) Recognition of the Soviet Government. (Succeeded.)
- (3) Six-hour day and a five-day week. (Was before Congress at time of Supreme Court decision.)
- (4) Increased inheritance tax. (Now being enacted.)
- (5) Increased income taxes. (Succeeded.)
- (6) Moratorium on farm foreclosures. (Succeeded until knocked out by the Supreme Court.)
- (7) Socialization of the power, banking and other industries. (Already begun on a large scale under the NRA—until smashed by the Supreme Court. Socialistic power and banking planks now under consideration.)

- (8) Cancellation of war debts. (Tacitly successful, as nothing is being done in the matter.)
- (9) Independence for the Philippines. (Successful.)

Only two planks in the Democratic platform were put into effect. All others were repudiated.

Every plank in the Socialist platform except one (entrance into the World Court) has been favored and President Roosevelt did his best to enact that plank.

Who won the 1932 election, the Democrats or the Socialists?

As the Socialists have secured about everything they advocated in their platform while almost every plank in the Democratic platform has been repudiated, we leave the question with our readers.

The Price Paid By New England

THE March issue of *Industry and Labor*, Manchester, N. H., published a list of New England textile plants which have gone out of business since 1925.

The list is so long that it would fill five or more of our pages, but we quote the following as a few extracts:

Everett Mills, Lawrence—143,000 spindles. Employed 2,000. Liquidated.

Tremont and Suffolk Mills, Lowell—230,000 spindles. Sold out and quit.

Manomet Mills, New Bedford—318,000 spindles. Liquidated. Machinery went South.

Acushnet Mill Corp., New Bedford—114,000 spindles. Employed 1,300. Liquidated.

Davis Mill, Fall River—130,000 spindles. Employed 900. Assets divided and plant shut down forever.

Great Falls Mfg. Co., Somersworth—Capital \$2,500,000. 128,000 spindles. Employed 1,800. Liquidated.

American Cotton Fabrics Co., Fall River—Capitalized at \$7,500,000. One of the many tire and cord fabrics mills forced to give up.

Ipswich Mills, Ipswich—Capitalized at \$3,000,000. Employed 2,500 people. Forced to liquidate.

Pocasset Mills, Fall River—123,000 spindles. Employed 950. Quit.

Sharp Mfg. Co., New Bedford—200,000 spindles. Employed 2,000. Liquidated.

Whitman Mills, New Bedford—177,500 spindles. Employed 2,000. Liquidated.

Dartmouth Mfg. Corp., New Bedford—No longer listed. 172,000 spindles. Employed 2,000.

Fairhaven Mills, New Bedford—155,000 spindles. Employed 2,000. Liquidated.

Newmarket Mfg. Co., Newmarket—3,000 looms, 63,000 spindles. Employed 1,200 people. Established for more than a century. Labor troubles and high taxes motivated them to get out of the Granite State.

These are only a few of the two hundred or

more textile plants which were operating in New England but have gone out of business.

With them went jobs for more than 180,000 textile workers.

Taxation and excessive regulations played a part in their disappearance, but the real force was the activities of the leaders of organized labor and the constant threat of strikes.

Thos. F. McMahon and Francis J. Gorman were in charge of union activities in New England and are responsible for the more than 100,000 textile workers permanently losing their jobs.

Having wrecked the textile industry of New England, these racketeers are now in the South seeking to force Southern cotton mill operatives to pay enough dues to support them in luxury and comparative idleness.

Our Sentiments

THERE was a time when Congress possessed the intelligence to meet great crises, and in proper co-operation with the other two co-ordinate branches of the Government, solve them in statesmanlike fashion.

There was a time when the Congress was composed of self-respecting American citizens.

That time has passed.

The Congress of the United States has earned the contempt of the nation.—*New York American*.

Teacher's Oath Bill

WE note the following newspaper dispatch:

Boston, June 26.—The teachers' oath bill, which will require all American teachers in Massachusetts public and private educational institutions to pledge allegiance to State and National Constitutions, was signed by Governor James M. Curley Wednesday.

Proponents of the measure said it was aimed at "subversive" movements in educational institutions.

Those who draw their pay from the State of Massachusetts should not object to taking an oath of allegiance.

All State and County officials take such an oath and we do not see any legitimate reason why those who take money for teaching should not do the same.

The Worst Insects

This administration has shown that there is no insect that can bother a statesman like a professor.—Reprint from a statement by Will Rogers.

CUT POWER COSTS—SAVE TIME WITH NEW VULC-ON RUBBER TIRED WHEELS

GET THIS
Free BOOKLET

Big news for every user of industrial trucks! New type one-piece rubber tired wheels to fit practically any hand truck or industrial trailer. You can save as much as one-half on floor repairs with these new wheels. Reduce power costs. Increase handling speeds.

The rubber tires are actually *vulcanized* to the steel! Wheels are equipped with anti-friction bearings, standard lubrication fittings. Changeover from steel wheels is simple. The cost is surprisingly low.

And the service of a Factory Expert in analyzing your requirements for Rubber Tired Wheels. Write the B. F. Goodrich Co., Charlotte, N. C.

Mill News Items

CHESTER, S. C.—The slasher exhaust system at the Eureka plant, Springs Cotton Mills, is being rearranged, the work being done by the Textile Shop, Spartanburg, S. C.

SIMPSONVILLE, S. C.—The local plant of the Woodside Cotton Mills is having the slasher cylinders re-covered and repaired. The work is being done by the Textile Shop, Spartanburg.

BURLINGTON, N. C.—Mill No. 6, of the Burlington Mills here, has recently installed an H-W rayon yarn conditioner, and its plant at Mooresville, N. C., the Cascade Rayon Mill, has also completed the installation of one H-W rayon yarn conditioner.

TARBORO, N. C.—The Hart and Fountain Cotton Mills here closed for an indefinite period, throwing 700 out of employment. Lack of orders was given by the managements as the cause for the closing.

WEST POINT, GA.—Officials of the West Pont Manufacturing Company have announced they would pay on July 1st quarterly dividend checks of 1 per cent amounting to \$72,000. The company operates cotton textile plants at Lanett, Shawmut, Langdale, Fairfax and River-view, in Alabama.

ASHEVILLE, N. C.—In the case of the Clinton Cotton Mills, Clinton, S. C., in a petition for a review of the decision of the United States Board of Tax Appeals, the Circuit Court of Appeals here ruled in favor of the Clinton Cotton Mills. It was erroneously reported last week that the court ruled against the mills.

BESSEMER CITY, N. C.—The Gambrill-Melville Cotton Mill is back on a 40-hour week, following a conference between officials of the plant and representatives of the Bessemer City Local No. 2000 of the United Textile Workers, who protected the company's action of several days ago in decreeing a 50-hour week with no pay increase.

The fixed policy of the ownership, however, will not be known until local officials have received further instructions, expected in the near future, from the officers of the parent plant in Wilmington, Del.

GREENSBORO, N. C.—Under an order signed Thursday afternoon by Judge Johnson J. Hayes in Wilkesboro and filed in United States Court here, Charles H. Robertson, collector of internal revenue, in North Carolina, is temporarily restrained from further efforts to collect the March, 1935, processing tax from the Cannon Mills Company, Kannapolis, amounting to \$186,113.69, plus \$1,178.72 interest alleged due on the payment.

The collector is further restrained from "attempting to assess against, or to collect from, the plaintiff such processing tax, whether by distraint, levy, action at law or in equity; or attempting to assess or collect any penalty on said alleged tax." District Attorney Carlisle B. Higgins is also restrained from instituting any criminal action against the plaintiff Cannon Mills pending the further order of the court.

Judges Hayes set Monday, July 8th, at 10 a. m., in Greensboro, as the date for a hearing on making the temporary restraining order permanent.

Mill News Items

MACON, GA.—An order temporarily restraining collection of past due cotton processing taxes from the Acworth Mills, at Acworth, Ga., under a contention that the levy is illegal has been signed here by Federal District Judge Bascom S. Deaver.

Judge Deaver set the temporary injunction for hearing here July 5th to determine if it should be made permanent. The mill's petition contends the processing tax is illegal under the Supreme Court decision holding the NRA unconstitutional.

The order was directed against W. E. Page, collector of internal revenue.

CHERRYVILLE, N. C.—Stockholders of the Rhyne-Houser Manufacturing Company, at a special meeting, voted to purchase all the interest of the D. E. Rhyne estate in the mill. The amount involved more than \$140,000, or 40 per cent, of the outstanding stock.

The plant is valued at \$600,000 and is managed by local people.

Dr. F. M. Houser is president and A. H. Huss, secretary and treasurer.

There will be no change in the officers for the time being.

The mill has run on a near full time basis all during the depression.

KINSTON, N. C.—Thomas S. Maynard, who kept the Caswell Cotton Mills here in such shape that after a suspension of about 30 months they were put in operation within an hour, has been removed from a second custodianship. The plant has been idle since the first of the year, new owners having run into financial difficulties after a fairly successful year or two. Some weeks ago trustees were appointed in Federal Court at New Bern. One of the trustees resigned. One, I. B. Tucker, Whiteville, remained in charge. Maynard, who had been connected with the mills 12 years, was named assistant to the trustee and became custodian of the plant and properties tied to it for the second time.

Maynard stated that he had been removed by Tucker for "complaints." He said he had not heard of the complaints previously but had been told bondholders and stockholders, at variance over disposition of the mills, wanted him in charge of the plant, one of the finest in the South. He was dismissed by mail.

CEDARTOWN, GA.—Purchase of the equipment of the Standard Cotton Mills at Cedartown has been completed by the Uxbridge Worsted Company, it was disclosed after strike disturbances in New England brought announcement that still other units of the mill chain might be transferred to Georgia.

The Standard Cotton Mill at Cedartown was purchased by Uxbridge officials on May 16th. It has since been equipped with 100 looms for worsted cloth. Employment will be furnished to 300 workers. There is 75,000 square feet of floor space in the building.

Another purchase of a mill plant is being contemplated at Macon, Ga., it was disclosed, with the possibility that over a period of years the entire Uxbridge chain will be removed to this State.

Uxbridge operates six mills under that name and ten other mills under various trade names. They are located in the New England States.

RUST RESISTING FINISH

The fine, japanned finish on Stanley Bale Ties is smooth, durable and practically impervious to rust.

The superior handling qualities of these ties is obvious. In addition to this smooth, clean finish Stanley Bale Ties offer the advantages of ROUND SAFETY ENDS and ROUND SAFETY EDGES which eliminate the possibility of dangerous cuts and scratches to hands and arms.

Inquiry for Goods is Better

"There has been some improvement in inquiry during the past week. First-hand sales of print cloths have been made, in some instances at slight

concessions, but as a whole, the market has held generally unchanged," says Woodward, Baldwin & Co.

"Interest in broadcloths continues to be lacking.

"The bag trade was a good buyer of certain sheeting constructions for both nearby and later deliveries at full market prices.

"There seems to be a better feeling among buyers who believe that when the inventory period is out of the way some fall covering is likely to begin.

"The heavily reduced production program which is going into effect next week throughout all the textile mills is receiving favorable comment in the press and is being regarded as quite constructive."

Many Mills Are Closed This Week

W. M. McLaurine, secretary of the American Cotton Manufacturers' Association, said he was informed practically all Southern textile plants remained closed this week, observing the curtailment program recently agreed upon by a large portion of the industry.

Mr. McLaurine said he did not have reports from individual con-

cerns, but that his advices indicated few if any spindles were turning, and would not do so for a week.

Hosiery mills were also reported joining in the movement, some of them closing down completely and others running irregularly.

Manufacturers are seeking a 50 per cent reduction in production this month, in an effort to stabilize prices, and chose this week, the usual inventory and Fourth of July period, in which to center their efforts.

Amoskeag Files Big Processing Tax Suit

Suit for \$2,500,000 was brought in Federal Court at Concord, N. H., by Amoskeag Manufacturing Company of Canechester, largest cotton mill in the country, charging that cotton processing and floor taxes are unconstitutional. This is the largest of a series of such suits which have been filed in the past few weeks by mills, both in the North and South.

The suit of the Amoskeag Company was brought against Peter M. Gagne of Somersworth, N. H., as collector of internal revenue for New Hampshire, and contends that \$2,170,628 was paid to the Government from August 1, 1933, to March, 1935. The suit alleges that the taxes were unlawfully assessed and unlawfully collected.

Cannon To Sell Travora Co. Products

Travora Manufacturing Company, Graham, Alamance County, N. C., has appointed Cannon Mills, Inc., sole selling agents to enjoy the advantage of having their fabrics distributed by a nationally known organization. This mill produces Canton flannel and dyed napped fabrics constructed to a high standard.

Dividends By Davenport Hosiery Mills

Davenport Hosiery Mills, Inc., has declared the regular quarterly dividends of \$1.75 per share on the preferred and 25 cents on the common stock, payable July 1st to stockholders of record June 24th.

COOKEVILLE, TENN.—The Peerless Woolen Mills of Rossville, Ga., have purchased fully 90 per cent of an estimated 75,000 pounds of wool shipped from Putnam and adjoining counties this year. This embraces sales by local produce houses and the co-operative wool pools held at Cookeville by farmers and growers.

Marion Mills Seek Process Tax Refund

Greensboro, N. C.—In a complaint filed in United States District Court here the Cross Cotton Mills Company, of Marion, in an equity action against Charles H. Robertson, collector of internal revenue in North Carolina, seeks to recover cotton processing taxes in the sum of \$154,754.80

declared to have been paid by the company to the Federal Government and asks for a temporary injunction restraining the defendant from continuing to collect "the so-called and alleged taxes."

Embraced in the complaint is an allegation that the processing tax and the Agricultural Adjustment Act under which it is being imposed are violative of the United States Constitution. The court is asked for a dec-

laratory judgment adjudging the act and "the so-called taxes" unconstitutional and void. The plaintiff also seeks recovery of cotton floor stock taxes amounting to \$1,650.93.

Consolidated Mills To Reduce Schedules

Lynchburg, Va.—Consolidated Textile Corporation reduced its force by one-half in the Lynchburg and in the three North Carolina mills, effective June 24th, Allen F. Johnson, vice-president, announces.

Only one shift will be employed 40 hours a week at the four textile plants, he said. This means that 450 operatives will be thrown out of work in Lynchburg, Mr. Johnson said conditions now indicate that they will be idle for the rest of the summer.

"Cotton textile conditions at present do not warrant working 80 hours a week," Mr. Johnson said.

To Continue Curtailment On Sheets, Pillow Cases

At a very largely attended meeting of wide sheeting manufacturers at the Cotton Textile Institute it was brought out that the conditions which led to the present schedule of operations in that group under the NRA have not changed and it was the expressed intention to continue voluntarily along the same line.

Cotton Goods Markets

New York.—The cotton goods markets were slightly better last week, although total sales continued small. Sales of gray goods were large enough to take care of about all of the available goods offered by second hands. With these goods out of the way the market is confident that a better basis for a higher and more active market. Buyers have consistently delayed purchases and it is felt that the heavy curtailment this month will soon be effective in bringing them into the market. It is believed that early buying will begin at the low prices now available but that advances will come promptly as soon as sales begin to expand.

Second hands sold fair quantities of print cloths and at the end of the day had no 64x60 to sell under 5 $\frac{7}{8}$ c and no 68x72s under 6 $\frac{7}{8}$ c. First hands generally wanted even money or higher on each of these styles and it was reported that some deliveries sold in first hands at even money. The volume of first hand business was light, however.

Carded broadcloths were quiet. One or two first hand sellers were offering the 100 at 8 $\frac{1}{4}$ c and the 80x60s were available at 6 $\frac{3}{4}$ c.

In the sheeting division some scattered sales, chiefly for nearby deliveries, developed during the day. These included 36-inch 4-yard 56x60s, at 7 $\frac{3}{4}$ c, 37-inch 4-yard 48 squares at 7c, 36-inch 4.70s at 6 $\frac{1}{4}$ c, 40-inch 2.85s at 9c, 40-inch 3.75s at 7 $\frac{3}{4}$ c and 36-inch 5.50s at 5 $\frac{1}{8}$ c, although on the latter style most sellers wanted 5 $\frac{1}{4}$ c.

In the fine goods markets there was little in the way of active trading in the standard constructions, although during the past day or two there have been some scattered sales of combed and carded lawns, which were sufficient to establish the stability of prices.

There was very little business in any of the other finer goods constructions. Somewhat better inquiry was noted in some lines, including rayon fabrics. However, under present conditions buyers show little confidence in the market, due to a number of disturbing factors.

Print cloths, 27-in., 64x60s	4 $\frac{7}{8}$
Print cloths, 28-in., 64x60s	5 $\frac{1}{8}$
Gray goods, 38 $\frac{1}{2}$ -in., 64x60s	6 $\frac{1}{8}$
Gray goods, 39-in., 80x80s	8 $\frac{7}{8}$
Gray goods, 39-in., 68x72s	7 $\frac{1}{8}$
Brown sheetings, 3-yard	9
Brown sheetings, standard	9 $\frac{3}{4}$
Tickings, 8-ounce	18
Denims	14 $\frac{1}{4}$
Brown sheetings, 4-yard, 56x60s	7 $\frac{3}{4}$
Dress gingham	16 $\frac{1}{2}$
Staple gingham	9 $\frac{1}{2}$

Cotton Yarn Markets

Philadelphia, Pa.—Only scattered sales were reported in the yarn market during the week. Most business was for spot and ready delivery, although a few contracts were noted for later delivery. Mills have sharply curtailed production and schedules for this month are expected to be kept. Pressure against prices continued and buyers sought concessions from the already low levels.

Yarn distributors report that their mills are very slow to quote prices under present conditions and that spinners find no incentive to take forward business.

Uncertainty regarding the effects of a change in the status of the processing tax is most frequently given as the cause for hand-to-mouth buying and spinners do not look for any change in the type market we have until this is out of the way. Commission merchants report that their June volume will not only be small but that it will go under that for the corresponding month for several years.

The market has never recovered from the dullness that followed the NRA decisions late in May, although slightly more inquiry was seen in the last week. It came from more mills buying not from any increase in the size of the average transaction. In the fact of such conditions the price list holds unchanged which sellers here regard as significant.

Meanwhile, spinners and others are observing closely the various attempts made by consumers to establish a basis for claim for refunds should the processing tax be reduced or eliminated. If the tax should be eliminated such action would probably result in adjustment of prices on unfilled balances of contracts. Consumers, however, some of whom are offering separate checks, one covering their estimate of the advanced cost of the yarn owing to the tax, are not unlikely to ask that qualifying the clauses be written into all their contracts.

Combed spinners are reducing their operating schedules in line with dullness in demand, refusing to spin for inventory. They report orders on their books are at the lowest ebb for several years, in contrast to conditions early this year and most announce they will follow along these lines for the present. Sales in the last week have been for immediate use and well scattered among knitters

Visiting The Mills

By Mrs. Ethel Thomas Dabbs (Aunt Becky)

FAYETTEVILLE, N. C.

PURITAN WEAVING CO., H. O. STRUPLER, SUPT.—ONE OF THE MANY SILK MILLS UNDER THE SAFE AND SOUND LEADERSHIP OF J. SPENCER LOVE, OF BURLINGTON MILLS, BURLINGTON, N. C.

The more silk mills I see the better I like them. They are so clean and dustless. Operatives look "just out of the band box." The girls in the throwing room dress in pure white. No one goes dirty.

Puritan Weaving Company is running right along—some parts of it on three shifts, giving work to many who are grateful for the chance to work. There is no carding and spinning but plenty of other departments, and the key men are all progressive and read the Textile Bulletin. Mr. Strupler, the superintendent, had already sent in his renewal subscription, but I secured 28 others who appreciate the sound policy of our journal, and especially the editorials of the justly famous David Clark—a man who has the courage to express himself "just as he is." He is a "square shooter" and the true friend of every decent textile person, from sweeper to president.

THE KEY MEN IN MILL

J. E. Napier, overseer weaving, first shift, B. F. Sorgee, overseer on second shift, and J. W. Carter, overseer throwing, have my sincere thanks for courtesies extended. This also goes for Superintendent Strupler and office force—B. Heller, manager, assisted by John Buie, and Mrs. Sutton, stenographer.

T. L. Dugger is second hand in weaving on first shift (my carbon slipped and I'm wondering if I have his name spelled correctly) is a coming young man; W. L. Lashley, O. C. Griffin, Oscar Collins, R. C. Harris, F. C. Norton and W. L. Smettzer, loom fixers; J. H. Parrish, warp man.

J. H. Hendrix is fixer in the coping room; this is where silk filling is wound on bobbins ready for the shuttles—provided any of our readers need enlightening—as I did.

R. I. Templeton is second hand in weaving on second shift; L. V. Seawell, second hand in twisting; W. N. Houtchins, C. W. Walden, E. M. James, A. L. Osborne and Troy Faircloth, loom fixers; C. A. Lashley and T. M. Underwood, warp men; Jim Fisher, smash hand.

In throwing room, H. C. Duffer is section man and L. L. Brown, clerk. G. R. Leatherwood is overseer of the cloth room, and the method of inspecting is certainly perfect. The cloth runs over a roller in front of a window and the light shines through showing every imper-

fection—even to uneven yarn. Mr. Leatherwood knows his silks. W. E. Atkinson is master mechanic.

TOLAR, HART AND HOLT MILLS

J. W. Tolar, secretary and treasurer, is among the most progressive and likable textile leaders in the State. This mill has 14,364 spindles on hosiery yarns and is running right along.

C. L. Teal and W. V. Lovick are overseers carding; G. B. Tolar and C. M. Graddy, overseers of spinning; J. H. Tyndall, master mechanic.

WILMINGTON, N. C.

SPOFFORD MILLS, INC., AMONG THE MOST PROGRESSIVE. A DOCTOR'S CLINIC, FIRST AID SERVICE AND LOVELY SWIMMING POOL ALL CONVENIENTLY NEAR THE PRETTY MILL OOOICE.

Spofford Mills—formerly the Delgado—seems to have taken a new lease on life and interesting activities. Years ago, when I first visited this mill, the product was colored goods and the mill was not attractively clean. But now the product is white goods and the plant is wholesomely clean and the grounds and village homes are beautiful with shrubbery and flowers.

THE OFFICE FORCE

J. Holmes Davis, president, is truly wrapped up in his work and the people of his mill—especially the young people. One catches a glimpse of the real man, when he watches the children at play in the beautiful swimming pool out back of the office. His son, J. Holmes Davis, Jr., is agent and treasurer. T. R. Aimes is office manager, Mrs. Frances Pittman, stenographer, and Mrs. Holt Albright, timekeeper. The friendly atmosphere in and around the office is a heart warmer.

KEY MEN IN THE MILL

W. C. Scoggins is the genial superintendent; J. H. Riggins, overseer carding and spinning. On first shift, L. F. Herring is assistant carder, and J. F. Branch, card grinder. On second shift carding, C. R. Batton is second hand.

In spinning, A. B. Holloman is assistant overseer, first shift; A. W. Lee, assistant overseer on second shift; Leo Gainey and E. N. Gore, section men.

J. B. Hornaday is overseer weaving, with J. T. Hardison, assisting on first; E. W. Walden, overseer on second shift, with Johnnie Taylor, second hand. R. N. Johnson on winding, warping and slashing, first shift, and H. Z. Simpson, second shift.

C. L. Jerrell, overseer the cloth room, where there are a number of truly pretty girls. J. S. Albright is an alert master mechanic and has a nice shop. G. R. Cottle is yard overseer.

THE CLINIC

Dr. John B. Cranmer has an office and examination rooms, lounging room, etc., and a splendid supply of drugs, in a neat building across the street from the mill. Mrs. Page, his assistant, has charge of first aid and looks after the babies in the village. Watches to see that they grow and gain in weight as they should, and keeps a complete record of everything done. The small amount paid weekly to this good doctor is for the purpose of "keeping well," and it is his pride to prevent rather than cure sickness. Since this work was begun in October, 1934, only three deaths have occurred in this big village, and they were old people and chronic cases.

THE SWIMMING POOL

The swimming pool is one of the nicest the writer has seen. Tom Aimes, son of the office manager, is home from the University to spend vacation, and has the job of life guard at the pool. He teaches the youngsters to swim and sees that no one gets drowned.

Mrs. Davis, wife of the president, gave a swimming party here recently that was enjoyed by 225 children between the ages of seven and twelve.

GARDENS AND FLOWERS

The soil here is extremely fertile. The mill company has gardens plowed for people in the spring and flower seed are furnished free. No wonder that there are so many fine gardens and pretty flower yards. The village homes are neat and roomy. There are trees and trees—great spreading oaks—shady drives and gorgeous flowers.

Added to all this, the beach is not so far away and can be reached by street cars. Thanks to Mr. Riggins, overseer carding and spinning, I saw more of Wilmington than ever before. Visited his farm on the Sound, ate plums from his garden, saw the place where he gives fish and oyster suppers, walked out on his pier, examined young oysters from his oyster beds and met his very friendly "better half." Wrightsville and Carolina Beaches are overflowing with people and the surf here is splendid. Myrtle Beach enthusiasts try to leave the impression that "everybody prefers" that beach, and that very few go to the North Carolina beaches. This is not a fact; thousands were swarming at Carolina where I spent the night and the formal "opening" still three days ahead. Demonstration Clubs from five counties were coming

next day, and a big hotel clearing the complete ground floor for their displays.

Wrightsville is growing rapidly since the northern wing, including the leading hotel, was destroyed by fire. Many of the draw-backs to growth have been done away with. The toll bridge is one of them. A highway is being built for motorists, and it is probable that Wrightsville Beach, Carolina Beach and Wilmington will finally be linked together by a "belt line" road. When this happens, there will not be a resort anywhere on the Atlantic that can compete with Wilmington.

Mr. Riggins has a cottage on the Sound which needs repairing, and he says when it is ready for occupancy, he is going to let "Aunt Becky" use it on her vacation—or for a week when she wants it. Won't that be grand?

Summing up advantages that Spofford Mill people have, it seems to me that they are bound to be wonderfully happy. Certainly they are wonderfully blessed and here's hoping that the peace and harmony of that pretty community will never be broken.

Thanks to Messrs. Davis, the office force, the overseers and all who gave me such a cordial welcome and reception.

READY FOR PROMOTION

There's going to be a vacancy above you later on
Some day you'll find the foreman and the superintendent
gone,

Are you growing big enough, when this shall be the case,
To quit the job you're holding now and step into his
place?

You do the work you have to do with ease from day to
day,

But are you getting ready to deserve the larger pay?
If there should come a vacancy with bigger tasks to do—
Could you step in and fill the place if it were offered you?

Tomorrow's not so far away, nor is the goal you seek,
Today you should be training for the work you'll do next
week,

The bigger job is just ahead, each day new changes
brings—

Suppose that post were vacant now, could you take charge
of things?

It's not enough to know enough to hold your place today,
It's not enough to do enough to earn your weekly pay.

Some day there'll be a vacancy with greater tasks to do—
Will you be ready to fill the place when it shall fall to
you?

—EDGAR GUEST, in *Industry and Labor*.

Cotton Spindle Activity Shows Decline For May

Washington.—According to preliminary figures released by the Bureau of Census, 30,585,726 cotton spinning spindles were in place in the United States on May 31st, of which 23,027,780 were operated at some time during the month, compared with 23,853,816 for April, 24,571,314 for March and 25,895,778 for May, 1934.

It is computed that cotton spindles were operated at 83.4 per cent capacity in May, compared with 85.3 per cent in April, 92.9 per cent in March and 98 per cent in May, 1934.

According to the figures, 16,830,156 spindles were active during May in the cotton-growing States, 5,513,956 spindles in the New England States and 683,668 spindles in all other States.

CEDARTOWN, GA.—Cedartown Textiles, Inc., of Cedartown plans to start production this week. As all machinery is not as yet installed, operations will be more for instruction purposes. Some months ago the Uxbridge Worsted Company of Uxbridge Mass., bought the Standard Cotton Mills of Cedartown. All machinery was removed and new machinery installed for the manufacture of woolen and worsted products. The same company has a similar plant at Macon known as Macon Textiles, Inc. These two units will be under the direction of D. W. Barnes. From 125 to 150 operatives are expected to be employed by this unit when in operation.

**"In 10 days I'll have our
twisting costs cut 20%!"**

Woolen mills, as well as cotton mills, get substantial production increases after installing DIAMOND FINISH Eadie Rings. By replacing flange rings with our auto-lubricated vertical type, they are able to spin and twist larger packages at higher speeds with as much as 90% reduction in fly. The average mill realizes a 20% decrease in labor and overhead cost per lb. Install a trial frame now!

Books That Will Help You With Your Problems

"Clark's Weave Room Calculations"

BY W. A. GRAHAM CLARK

Textile Expert of U. S. Tariff Commission

Second edition. Completely revised and enlarged. A practical treatise of cotton yarn and cloth calculations for the weave room. Price, \$3.00.

"Practical Loom Fixing" (Third Edition)

BY THOMAS NELSON

Completely revised and enlarged to include chapters on Rayon Weaving and Rayon Looms. Price \$1.25.

"Carding and Spinning"

BY GEO. F. IVEY

A practical book on Carding and Spinning. Price, \$1.00.

"Cotton Mill Processes and Calculations"

BY D. A. TOMPKINS

Third edition. Completely revised. An elementary text book for the use of textile schools and home study. Illustrated throughout. Price, \$2.00.

"Remedies for Dyehouse Troubles"

BY WM. C. DODSON, B.E.

A book dealing with just that phase of dyeing which constitutes the day's work of the average mill dyer. Price, \$1.50.

"Cotton Spinner's Companion"

BY I. C. NOBLE

A handy and complete reference book. Vest size. Price, 75c.

Let us solve YOUR problems for you!

Question

COMPANY MEMORANDUM

To: Textile Research Department
From: Mill Starch Division

In connection with the "Question and Answer" campaign we are carrying on, we received the following inquiry:-

Does the acidity in any of the ingredients used in a size effect the consistency in cooking?

Please let us have an early reply.

COMPANY MEMORANDUM

To: Mill Starch Division
From: Textile Research Department

Answering your memo of recent date:-
High acidity in the size mixture may cause a thinning of the consistency of the paste under continued cooking.

For maintaining uniformity care should be taken when changing any of the ingredients of the size used with Starch to test those ingredients for their acid value.

The presence of acid may not be objectionable, but should be recognized in order to assure uniform performance in the slashing operation.

In manufacture, to change Thick Boiling Corn Starch to Thin Boiling Starch it is given an acid treatment at an increased temperature and then the acid is neutralized. If acidity is present in the sizing mixture a thinning action will probably result in the paste.

THE facilities of our Research Department are at your disposal. We hope you will feel free to take advantage of this service.
